PROFESSIONAL SUMMARY

Cloud engineer and AWS Certified Solutions Architect – Associate with almost five years in IT and network infrastructure support for a FTSE250 company across 31 UK sites. I build AWS and Azure environments with Terraform and GitHub Actions, with projects on GitHub and Medium. In my position at Ibstock I work on Palo Alto, Cisco ASA and Fortinet firewalls, SD-WAN connections for all sites and Cisco and Meraki networking. I train users on working with MS Copilot and build automation flows using MS Power Platform. I have also recently started supporting the company VMware environment. Before IT I spent several years in Corporate Banking, working for Santander, where I learned to deal with high-pressure situations and important internal and external stakeholders.

TECHNICAL SKILLS

Cloud (AWS/Azure): EC2, S3, RDS, VPC, Lambda, IAM, CloudWatch, Route 53, Secrets Manager.
IaC and Automation: Terraform, Bash scripting, Python (learning), GitHub Actions CI/CD.
Networking and Security: Palo Alto, Cisco ASA, Fortinet, SD-WAN, Cisco CCNA, VPN, DNS, TCP/IP, OSI troubleshooting.
Systems and Operations: Active Directory, Microsoft 365, Exchange, Intune, VMware (support), Mitel VOIP, incident management, root cause analysis, SLAs.

CLOUD PROJECTS & PRACTICAL EXPERIENCE

- AWS Server-Based Application Architecture (Terraform, AWS)
- Built full multi-tier Terraform architecture including VPC with public/private/isolated subnets, ALB, autoscaling EC2, RDS MySQL, Secrets Manager and SSM
- Implemented secure networking: SGs, NACLs, KMS encryption, route tables, NAT gateways
- Automated deployment pipeline using GitHub Actions (lint, validate, plan, apply, drift detection)
- Developed and deployed Python Lambda API with separated handler and business logic
- Implemented async processing pipeline using SQS → Lambda → DynamoDB → SNS
- Azure Infrastructure (Terraform)
- Designed and deployed Azure equivalent architecture using Terraform: VNet, subnets, App Gateway + WAF, Key Vault, Azure MySQL, NSGs

CERTIFICATIONS & PROFESSIONAL TRAINING

- AWS Certified Solutions Architect – Associate (SAA-C03)
- Cisco CCNA
- Microsoft Certified: AI Business Professional (AB-730)
- AWS Certified Cloud Practitioner (CLF-C02)
- Azure Fundamentals (AZ-900)

CAREER HISTORY

May 2024 – Present **Ibstock Plc**
2nd / 3rd Line Network Analyst

- Administer Palo Alto NGFW and Cisco ASA firewalls across the estate, covering rule creation, object management, traffic analysis and escalation troubleshooting
- Create and update Fortinet firewall policies, objects and groups and troubleshoot traffic issues, using FortiManager and FortiAnalyzer
- Manage internet connectivity for 31 UK sites and a cohort of remote workers, and support the SD-WAN implementation, liaising with sites and equipment providers to ensure smooth transition of networking services
- Configure and maintain Cisco switches, Cisco WLC and Meraki access points, and administer Azure resources
- Support the 3rd Line team with the company VMware environment, MS365 and Intune MDM administrative tasks
- Lead the MS Copilot rollout in the business: approve licensing requests, train new users and provide implementation reports to the Executive Leadership Team
- Build automation flows with MS Power Platform and MS AI Builder, including shared mailbox auto-replies and an order-processing proof of concept
- Liaise with MSP support companies, hardware and software vendors and contractors
- Administer the corporate Mitel VOIP telephony system (user creation, extension and agent group setup and changes), train new starters and write procedural documents for the Service Desk
- Active Directory: full users, shares and assets administration from creation, through access permissions to deletion

Nov 2023 – Apr 2024 **Ibstock Plc**
2nd Line Support Analyst

- Led the Desktop Refresh Project for exchanging the full suite of end user devices and peripherals in the company
- Prepared and executed the exchange of entire hardware (50 end users) and network fleet for a newly acquired business
- Administered mobile devices via Apple DEP and MS Intune MDM
- Created solution documents for Line 1 to accelerate issue resolution process and limit number of escalations
- Led the project for PoC implementation of the Google Flex OS onto the company's estate
- Supported 3rd Line with a variety of tasks, including virtual machines administration, email filtering, share permissions etc.

Mar 2022 – Oct 2023 **Ibstock Plc**
1st Line Service Desk Analyst

- Served as 1st line IT support to over 1500 users across the country, via telephone, email, chat and face to face

- Diagnosed and fixed issues related to all aspects of end user experience, software, hardware, VPN, printers and networking
- Set up email accounts, shared mailboxes and distribution lists in both Exchange and Office 365 environments
- Performed software monitoring and installed updates to remove critical vulnerabilities

Dec 2021 – Mar 2022 **PerkinElmer Testing Laboratory**
IT Systems Support

- Provided 1st and 2nd line IT support to over 20 office staff and management and over 400 laboratory staff in a high-pace and result driven environment
- Troubleshot and fixed hardware and software faults, using OSI model, to ensure optimal performance of equipment and continued testing capacity of the lab and availability of supporting services
- Installed networking hardware, managed and mapped networking connections to guarantee optimal utilisation of resources

Jul 2021 – Nov 2021 **Birstall Testing Centre**
Support Personnel

Jan 2021 – Mar 2021 **Accept Recruitment**
Various Temporary Roles

Jun 2017 – Nov 2020 **Santander Corporate UK**
Service Support Manager/Business Consultant

- Successfully supported onboarding and provision of further lending for business banking and corporate clients, helping the bank acquire multimillion contracts
- Liaised with stakeholders within the Corporate Bank to resolve multiple-issue and complex enquiries, establishing lines of communication with key stakeholders to achieve outcomes for high profile cases swiftly
- Performed data and trend analysis for corporate incidents and preparing slides for presentation
- Coordinated the Customer Remediation Project, using Agile methodology
